

# 12 Reasons To Consider A Pole Barn Home

When most people think of the term "POLE BARN" or "POST-FRAME" construction, they typically think of a large barn or shop, not a home.

And yet, the pole barn structure is becoming a popular choice for home construction!

Why are people beginning to choose pole barn homes over standard home construction?

## HERE ARE 12 REASONS WHY!

- 1 Open Spaces**  
Pole barn homes allow for large, open spaces and floor plans to give you plenty of available room.
- 2 Personalized Construction**  
You can choose from a wide variety of styles, colors, components, and layouts.
- 3 Faster Construction**  
The materials and construction methods used on pole barn homes allow them to be built faster and safer.
- 4 Cheaper Foundation Costs**  
Pole barn construction does not require a basement or major foundation, so the foundation costs and labor are less.

- 5 Exterior Customization**  
Overhangs, dormers, and other exterior additions are easier to design and implement with pole barn homes.

- 6 Site Adaptability**  
Pole barn construction is highly adaptable to different terrains, foundation types, and ground material.

- 7 Allow Large Openings**  
The spacing of pole barn construction posts gives plenty of room to use large windows, doors, entryways, and other openings into your home.

- 8 Less Maintenance**  
Due to the simple construction methods and materials, pole barn homes typically require less maintenance.

- 9 More Durable**  
The posts and foundations of pole barn homes allow them to withstand high snow and wind loads.

- 10 Less Exterior Work**  
If there is not a basement, pole barn construction requires little site preparation or exterior work to be done.

- 11 Better Efficiency**  
Pole barn homes have large wall cavities that are filled with insulation. This creates a more solid insulation wall with fewer breaks, resulting in better efficiency.

- 12 Cost-effective Construction**  
From the faster construction to less exterior work being needed, pole barn homes allow for the ultimate in cost-effective construction!

If you are interested in getting a quote for a pole barn home in Indiana from a reliable contractor, then contact K. Graber Construction today at 765-395-7275.
